

Animal Coexistence Subcommittee of Shelburne Natural Resources and Conservation Committee

Minutes, January 6, 2022 7PM

Present: Persis Worrall, Lisa Vear, Jon Cocina, Jim White, Don Rendall

Agenda was approved

No public comment.

Discussed separating the current Shelburne animal control policy (which focuses on domesticated animals) from this coexistence with this policy under development which can focus on wildlife. All agreed this would help the coexistence policy keep a greater focus. But the thinking was additional policy items would need to be added to the animal control policy. Don will research.

The group's focus turned to the google document draft version which Jon has set up. Revised the introductory paragraphs for more focus. Reviewed and tightened up the principals section. Attention will next focus on the problem and solution categories to give life to the types of conflict which will be addressed in this policy draft.

Next meeting set for January 27.

Adjourned 8:50 PM
