

We need your help!

Please consider completing this survey for the proposed Library Center project. **Completed surveys received by March 27th will be eligible for one of three \$100 cash cards!**

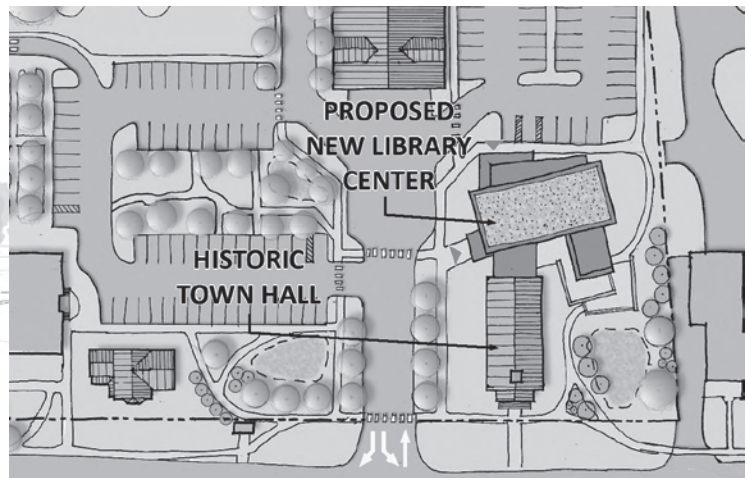

Faced with ongoing maintenance challenges, Town Officials and the Library Building Steering Committee have undertaken a 2-year, community-driven design process to create a long-term solution to solve the space and maintenance issues of the Pierson Library and the historic Town Hall. To help us move forward, we are asking about your willingness to support public financing for one of the two options described below.

OPTION #1: A \$6.5 million dollar bond to support:

- **A new cost- and energy-efficient, sustainably-designed structure** that will last for generations and will solve the ongoing maintenance challenges faced by the library
- **Larger library floor plan providing flexible spaces** for quiet reading/work, well equipped meeting rooms, community use, a business/technology center and a ground-level youth area
- Much-needed restoration **of the historic Town Hall**
- Improved parking, pedestrian access and traffic flow safety issues
- Improved **fire vehicle egress**, including a **left-turn exit lane**

OPTION #2: A \$3 million dollar bond to support:

- Much-needed restoration of the **historic Town Hall**
- Renovation of current library focused on youth area

NOT INCLUDED in Option #2:

- **A new cost- and energy-efficient, sustainably-designed structure** that will last for generations that will solve the ongoing maintenance challenges faced by the library.
- **Larger library floor plan providing flexible spaces** for quiet reading/work, well equipped meeting rooms, community use, a business/technology center and a **ground-level youth area**
- **Improved parking, pedestrian access and traffic flow**
- Improved **fire vehicle egress**, including a **left-turn exit lane**
