

# THE BASICS OF HOME COMPOSTING

*Keep food scraps out of the landfill with home composting!*

**Workshop Date/Time:** Wed., May 8th 6:00 - 7:30 PM

**Location:** Shelburne Municipal Bldg., Activity Rm. (ground floor)

Free! Please RSVP.

Chittenden Solid Waste's Community Outreach Coordinator, Lauren Layn, will outline the benefits of "closing the loop" with your own household food scraps and yard debris in a presentation on maintaining a healthy compost system.

In 2012, the Vermont Legislature unanimously passed the Universal Recycling Law (Act 148), this presentation focuses on keeping organic materials-like food scraps and other food waste –out of the landfill, which we be required for all Vermonters by 2020.

*You will learn:*

- What type of bin is best for you
- Where to locate your bin
- What to put into your bin (and what to avoid!)
- How to manage your bin
- Troubleshooting
- Harvesting your compost
- Alternatives to a backyard bin (pick up service, or drop-off composting)
